This intricate work is an invitation into the endlessly fascinating world created by Susan Te Kahurangi King. Delicate jewel-like colours and shaded graphite describe what, on first glance, looks like a topographical view of a coastline; on closer inspection, the image transforms into a sprawling mass of cartoon-like limbs surrounding a large, hairless head with sharpened teeth. Although relatively small-scale with a subdued palette, this drawing packs a powerful punch and appears imbued with a strong narrative, made all the more intriguing as it was created by an artist who stopped speaking at the age of four.
